Project Close-out Report

Name of Project: Empowering DeSci with Marlowe: A Free Course on Real-World Blockchain Applications

Project URL: <https://milestones.projectcatalyst.io/projects/1300094>

Project Number: 1300094

Name of Project Manager: Rivero Martín, PhD

Date Project Started: Jan 20, 2025

Date Project Completed: Oct 6, 2025

Final video link: <https://youtu.be/JgXq32XpKJQ>

Project KPIs and How DeSci Quark Addressed Them

1. Course Completion & Accessibility

- **KPI:** Deliver 100% of course content, with bilingual support and quizzes.
- **Addressed:** Completed the full 8-module curriculum (100 % content), subtitled in English and Spanish, with 8 quizzes + final exam uploaded and accessible.

2. User Engagement & Growth

- **KPI addressed:** As of 06 October 2025, 106 users registered, with 80 of them in the last 30 days. In the first two weeks after public launch, over 80 enrolled and 20+ completed the full course.

3. Pilot Testing & Iterative Improvement

- **KPI:** Recruit testers, collect structured feedback, and implement improvements.
- **Addressed:** Collected 37 applications → selected 15 testers → received 11 detailed feedback reports, compiled into a 70-page document. Implemented improvements in UI, instructions, navigation, and accessibility.

4. Community Outreach & Visibility

- **KPI:** Present the project in public events, issue certificates, and engage communities.
- **Addressed:** Participated online at Hosken Academy (Sept 11), in-person at Bolivia Cardano Summit (Sept 27), awarded ADA/NFTs in live quiz, and issued thank-you certificates to 16 speakers.

5. Open & Transparent Documentation

- **KPI:** Publish all course materials, revisions, and reports in public repositories.
- **Addressed:** Maintained two GitHub repositories:
 - Course materials: [desci-cardano-course](#)

All updates, milestone reports (v1, v2, v3), quizzes, and feedback logs are available openly.

- Smart contract examples: [marlowe-smart-contracts](#)

6. Sustained Accessibility & Future Growth

- **KPI:** Ensure the course remains free and continuously updated.
- **Addressed:** The course is now publicly accessible, free of charge, with future roadmap ideas that include expansions (e.g. Aiken, Midnight), community hubs, hackathons, and continuous improvements.

Key Achievements

- Delivered the entire course as an 8-module, bilingual translation with 19+ hours of video content.
- Completed interactive components: quizzes and smart contract tutorials.
- Engaged 16 expert contributors across academia, blockchain, DeSci, legal, and tech sectors.
- Successfully ran a pilot-testing phase that directly shaped final improvements.
- Built strong visibility via online and in-person events, rewarding community participation with ADA and NFTs.
- Created and shared a final project summary video to document the journey.

- Ensured full transparency by publishing every milestone, revision, and feedback iteration publicly on GitHub.

Key Learnings

- Iterative feedback loops are vital: early testers identified UX issues that would have been missed otherwise.
- Community engagement multiplies reach — real events, token incentives, and certifications helped boost awareness.
- Transparent documentation builds trust: public repositories allow anyone to follow progress and verify authenticity.
- Flexibility in development is essential — adapting course content, platform features, and links as needed helped maintain quality.

Next Steps

- Expand the curriculum to include **Aiken** contracts and **privacy features via Midnight**
- Create **physical hubs & workshops** to bring DeSci in-person to research communities
- Host **DeSci hackathons** combining blockchain and scientific research
- Continue promoting, updating, and evolving the course — remaining open, free, and community-driven

Milestone 1 Summary (for context)

Milestone 1 focused on establishing the foundation of the *DeSci Quark* project (Project Catalyst ID: 1300094), an educational initiative aiming to bridge decentralized science (DeSci) and the Cardano ecosystem. During this phase, the team completed the initial 30% of the course content, launched the project's web presence and communication channels, and laid the groundwork for platform development.

Key accomplishments included:

- Creation of a clearly branded identity (*DeSci Quark*), with a dedicated domain (desciquark.com) serving as the central hub for the course and community.
- Development of a detailed course structure covering 8 modules, up from the 6 initially planned.
- Delivery of 16 recorded and subtitled videos, along with quizzes and extra materials for Modules 0–2.
- Publication of an initial landing page (in English and Spanish) and a platform framework built on WordPress + LearnDash.
- Activation of official social media channels (X, LinkedIn, Instagram).
- Collaboration with 6 international contributors, each delivering insights on blockchain, legal, scientific, and decentralized topics.

In addition, feedback from Milestone 1 reviewers was addressed through:

- Clarification of technical terms (e.g., distinction between Cardano sidechains and partner chains like Midnight).
- Public sharing of previously restricted mockup links.
- Centralization of all deliverables and course materials in a structured GitHub repository: <https://github.com/desciquark/desci-cardano-course>

Milestone 2 Summary (for context)

This milestone marks the completion of the DeSci Quark course, focused on finalizing content, pilot testing, and refining the platform for public launch.

Key accomplishments included:

- Full course delivery: The remaining 70% of content was completed, bringing the total to 8 modules, 19+ hours of bilingual video, and 8 quizzes (including a final exam).
- Diverse speakers: 16 experts contributed from blockchain, science, education, fintech, and the Cardano ecosystem.
- Practical tutorials: Topics included wallet setup, SPO/DRep delegation, DeFi tools, scientific NFTs/FTs, and 6 Marlowe smart contracts for science.
- Pilot testing: 37 applied, 15 testers selected, 11 submitted detailed feedback—resulting in a 70-page improvement document. Testers received 50 ADA + NFT certificates.
- Platform refinement: Continuous improvements were made based on feedback, enhancing UX, navigation, and clarity.
- GitHub repositories launched:

Course: github.com/desciquark/desci-cardano-course

Smart Contracts: github.com/desciquark/marlowe-smart-contracts

- Public access: Platform demo video published ([YouTube](#)).

🗨️ Reviewer-informed updates:

- All broken/restricted links were fixed.
- Quiz permissions (Modules 3–7) corrected.
- Tester data anonymized in the new spreadsheet.

All updates compiled in the latest milestone report:

📄 [PoA-M2 v3 \(Reviewer-informed\)](#)

Final Report

Introduction

This final milestone marks the public release and community engagement phase of the *DeSci Quark* project — an educational initiative bridging **Decentralized Science (DeSci)** with the **Cardano ecosystem**.

Following the successful delivery of all course content, structured testing, and multiple iterations based on community and reviewer feedback, our final efforts focused on:

- **Opening public access** to the course
- **Improving platform and course UI/UX**
- **Promoting the course through strategic communication and community events**
- **Collecting data** and feedback from users
- **Defining next steps and growth opportunities**

Public Course Launch

- We transitioned from “**pre-registration**” to **full public registration** on our website. The course is now available for anyone to access, completely free of charge.
- Website improvements included:
 - Addition of a **GitHub button** to improve transparency.
 - **Visual alignment** of speaker photos.
 - Enhanced **navigation scroll behavior** for smoother UX.
- Platform refinements within the course:
 - Adjusted **video ratio settings** for better playback.

Project ID: 1300094

Name: Empowering DeSci with Marlowe: A Free Course on Real-World Blockchain Applications

- Added a **"Dashboard"** button at the course start for easier navigation.

The screenshot displays the DeSci Quark course dashboard. At the top, it shows the course title and a progress bar indicating 90% completion. Below this, the course description and objective are provided. The dashboard lists three modules: Lesson 0.1: Introduction, Lesson 0.2: Course Overview, and Lesson 0.3: Extra material. A user profile for Martin Rivero is shown with statistics: 1 Course, 0 Completed, 0 Certificates, and 0 Points. The 'Your Courses' section lists the course 'Blockchain Fundamentals and Advanced Tools for Scientists using Cardano' with a progress bar and a table of quiz results.

Quizzes	Certificate	Score	Statistics	Date
Lesson 6.4. Interactive Activity		33.33%	View	July 17, 2025 3:29 pm
Lesson 3.5. Interactive Activity		50%	View	July 25, 2025 6:50 pm

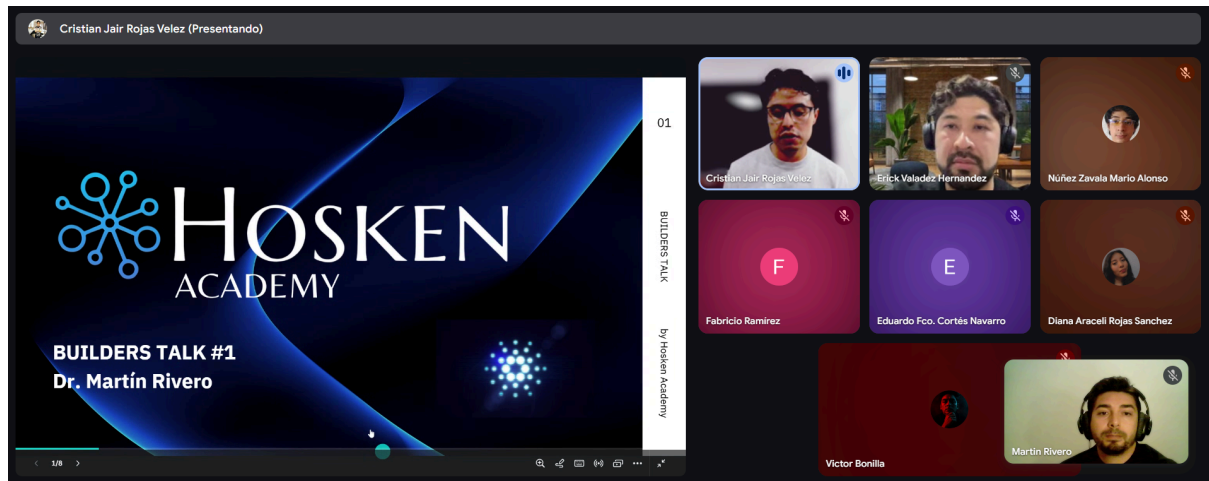

Communication & Community Engagement

To spread awareness of the course and foster community interaction, we carried out several outreach initiatives:

Online Participation

- On **September 11, 2025**, we were invited to present at the first **Hosken Academy** event, organized by the Mexican Cardano community.

 [Event Link – Luma](#)

In-person Presentation

- On **September 27, 2025**, we took part in the **Bolivia Cardano Summit**, where we:
 - Gave a live presentation of the course.
https://www.instagram.com/p/DPNRyiCEV6g/?utm_source=ig_web_copy_link
<https://x.com/DeSciQuark/status/1972821206530445532>
<https://x.com/CardanoSummitBo/status/197390458124022988>
 - Engaged participants through interactive science trivia based on course content.
 - **Awarded ADA and NFT prizes** to those who answered correctly.
<https://x.com/DeSciQuark/status/1973522730793443440>

Speaker Recognition

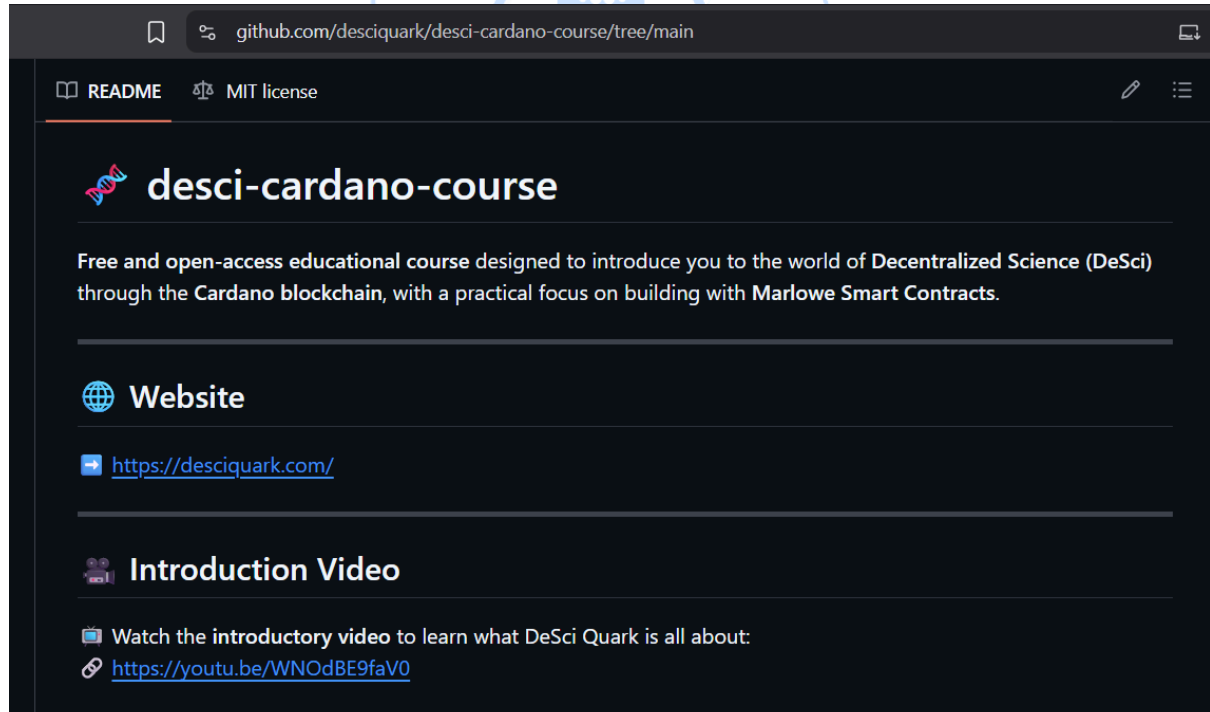

- We created and sent **thank-you certificates** to all 16 course speakers.
- Some of our speakers publicly shared their certificate on X:
<https://x.com/andamioseb/status/1974608678872633428>
<https://x.com/DanielaHubBr/status/1975193480688480551>

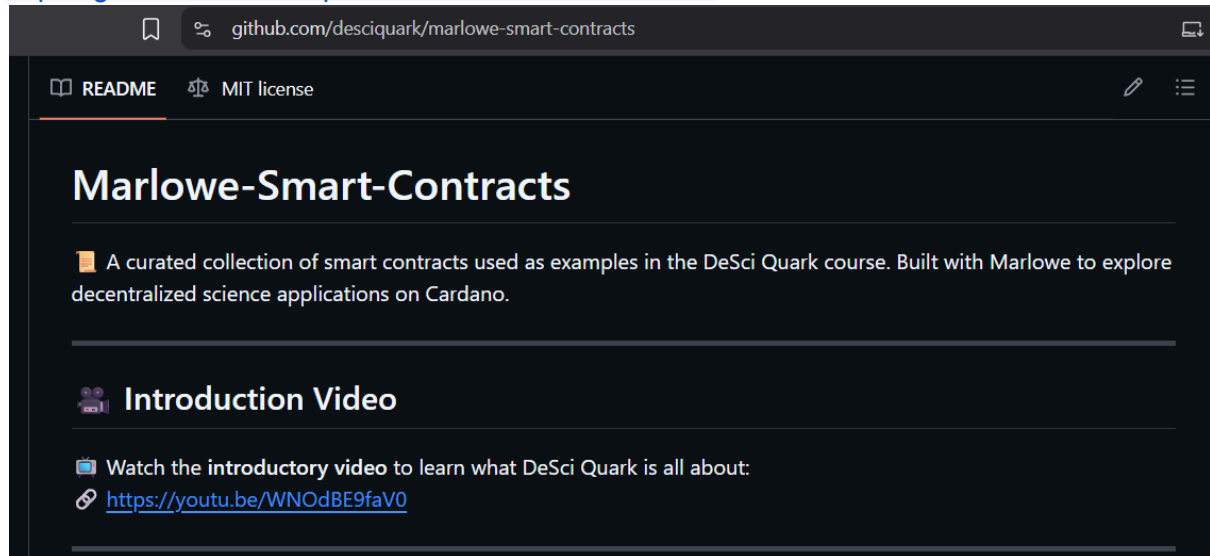

Video Summary & Promotion

- We produced a **short video summary** of the project.
 [\[https://youtu.be/WNOdBE9faV0\]](https://youtu.be/WNOdBE9faV0)
- The course launch and video were shared across our channels:
 - X (Twitter): <https://x.com/DeSciQuark/status/1974517796882292745>

Impact Analysis

We collected data from:

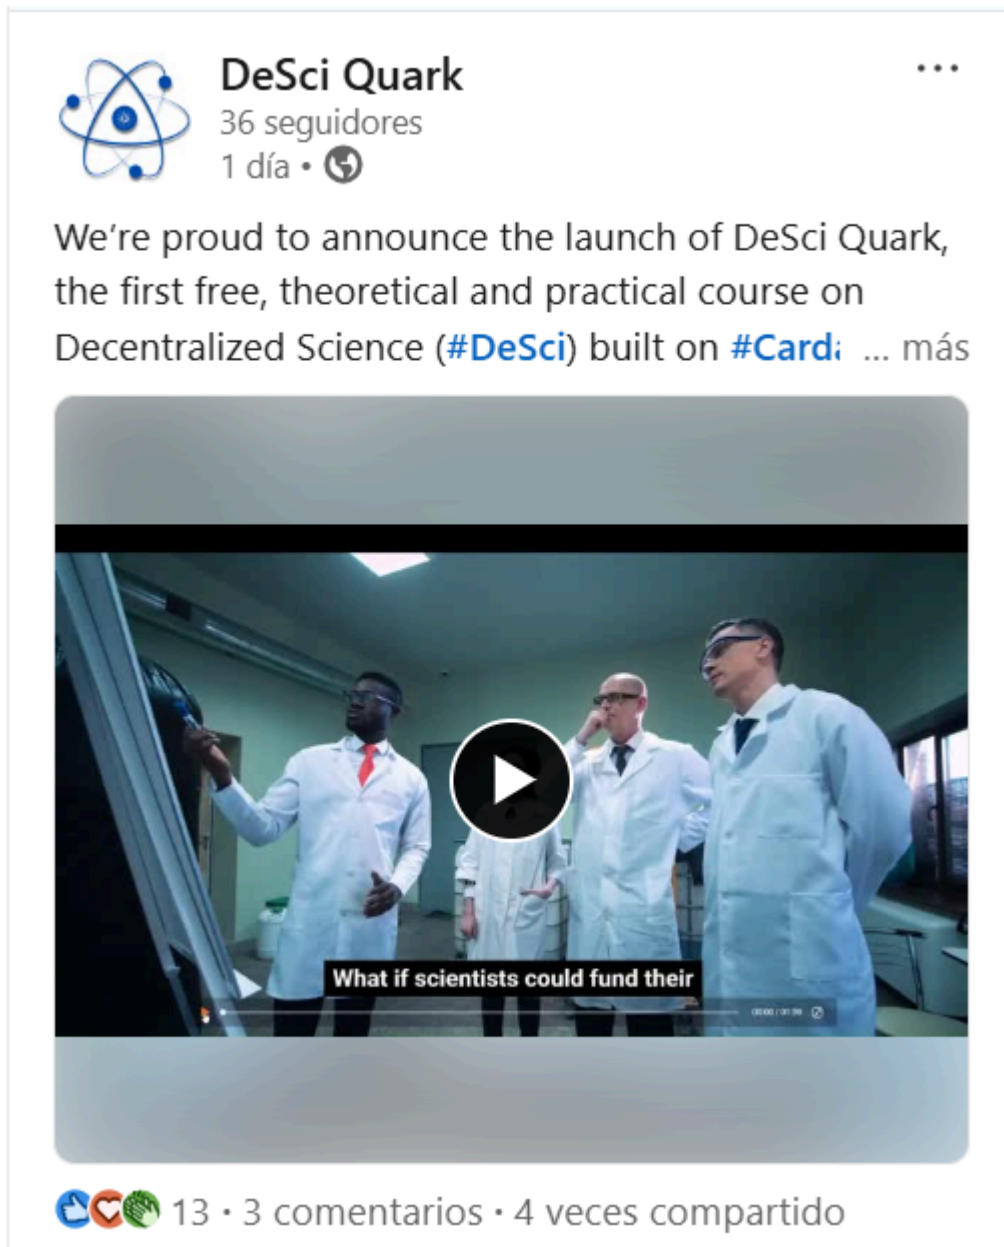

- **Social media metrics** on X, LinkedIn, and Instagram.

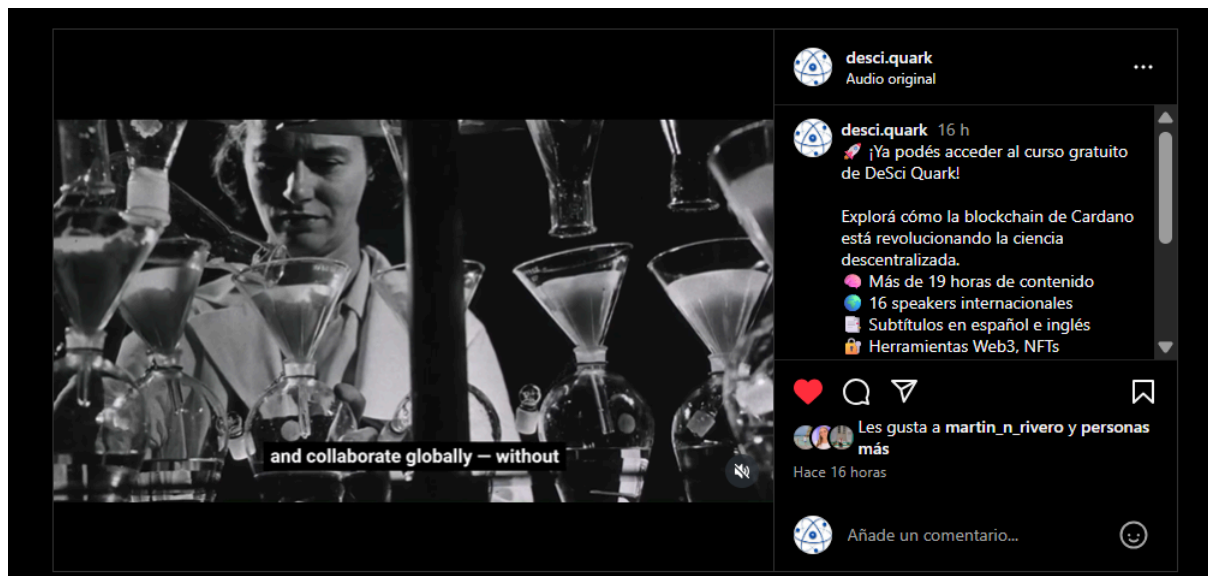

LinkedIn

Instagram

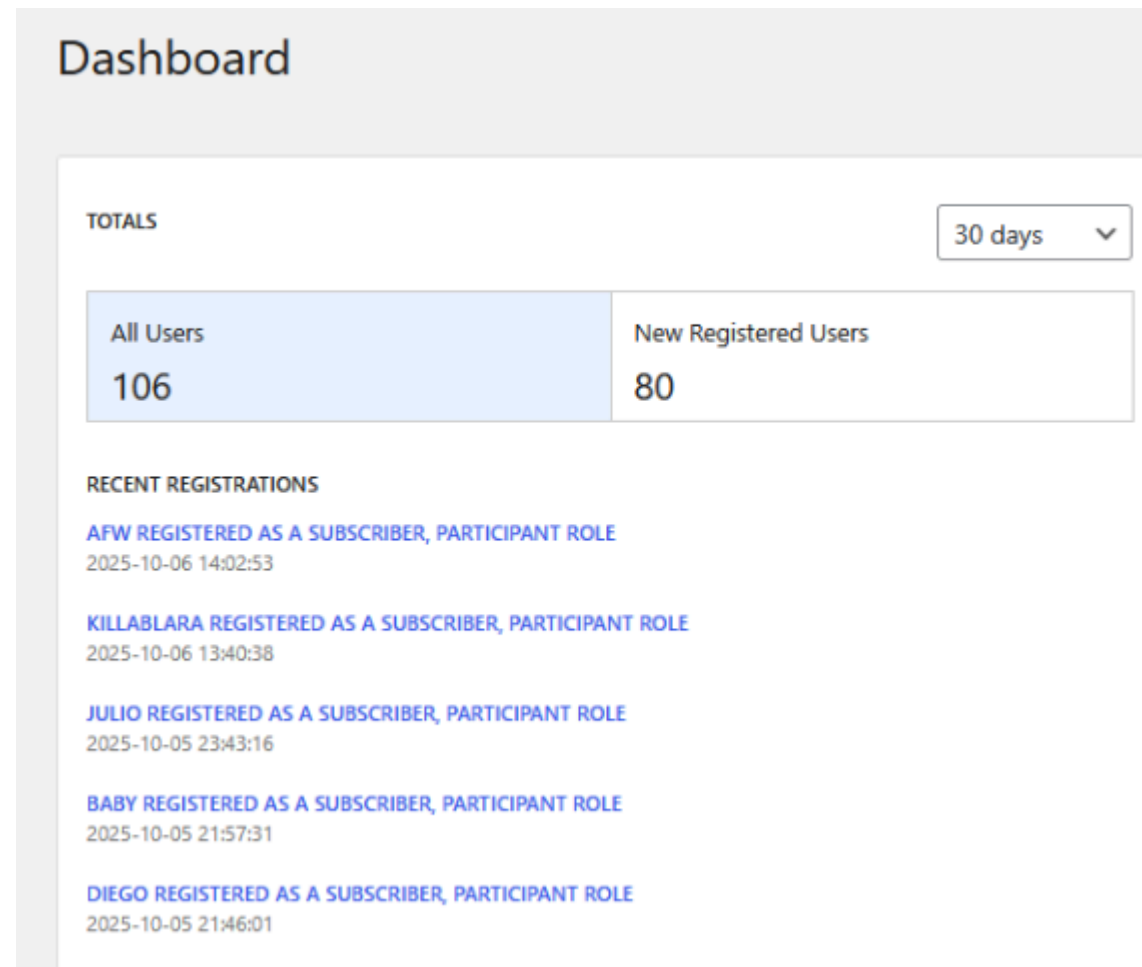

- **Course registration numbers** and completion data.

Growing Momentum! As of **October 6, 2025 (midday)**, we've reached an exciting milestone: **106 users have registered** for the DeSci Quark course — with **80 of them signing up in just the last 30 days!**

We officially began introducing the course to the public on **September 11** during our presentation at the **Hosken Academy**, and launched the full promotional campaign across social media on **October 4**.

The rapid uptake shows a growing interest in Decentralized Science and real-world blockchain education — and we're just getting started!

Recommendations & Next Steps

Based on the feedback received from participants, academics, universities, speakers, and community members (Cardano & DeSci), we propose the following future directions:

- **Expand the curriculum** with advanced topics such as:
 - Smart contracts in **Aiken**
 - **Privacy tools** using Midnight
- **Develop local hubs & in-person events**, including:
 - Talks
 - DeSci-themed workshops
 - Academic + research-focused hackathons
- **Ongoing accessibility**: Even after this final milestone, *DeSci Quark* will remain:
 - Open
 - Free to access

- Continuously promoted in the broader ecosystem

We are committed to **keeping the educational content live and evolving**, and to participating wherever needed to support the growth of Decentralized Science on Cardano.

Final Project Summary Video

To provide a concise overview of the DeSci Quark project, we have created a short summary video that highlights the goals, development, course content, engagement, and future vision of the initiative.

Watch the Final Project Summary Video:

Documentation & GitHub Tracking

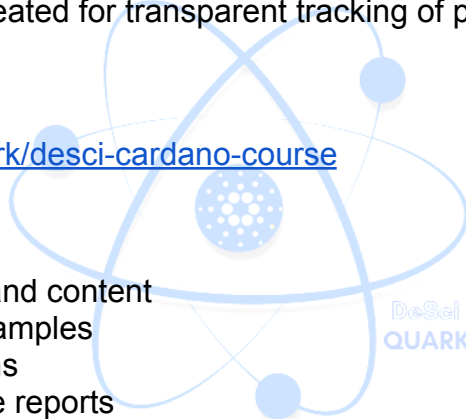

All course updates, improvements, and milestone-related modifications have been carefully documented and made publicly accessible through our **GitHub repository**, which was specifically created for transparent tracking of project progress and deliverables.

Project Repository:

 github.com/desciquark/desci-cardano-course

The repository includes:

- Course structure and content
- Smart contract examples
- Feedback iterations
- Updated milestone reports
- Quiz and test materials

This ensures transparency, traceability, and long-term accessibility for the community and reviewers alike.

Warm regards,
Martín Rivero
